# CRITICAL INFORMATION SUMMARY

## Mint Smart Phone Middle

---

### INFORMATION ABOUT THE SERVICE

#### Service Description

The Mint Smart Phone Middle plan provides your business with an Office Phone service delivered via your internet connection, sometimes referred to as internet or IP telephony.

#### Installation Requirements

An internet service with a minimum of 100/100 Kbps per concurrent call is required for a Mint Smart Phone service. You can utilise an existing internet connection or request a new one from Mint. Applicable internet rates apply.

You are required to install the handset(s) supplied as a part of your Mint Smart Phone service, including any associated cabling, configuration of your network and any routers and/or switches within your network to allow Mint Smart Phone to work.

#### Hardware and Minimum Contract Term

Hardware is purchased separately and is not included in your monthly service fees. Available on a minimum 6 month contract only.

#### Key Details

Your Mint Smart Phone Middle monthly access fee includes Line Rental, Local, National and Mint to Mint calls. Other call types not listed, optional Value Added Services and any equipment or other services required, are charged in addition to your Monthly Access Fee.

A Mint Smart Phone may not be appropriate if you require an uninterrupted phone service with access to 000 emergency services. The service will not function in the event of a power failure unless provided over the voice port (UNI-V) of the NBN connection box with an operational third party supplied battery back-up unit. It is your responsibility to maintain the battery and ensure that it is working correctly. Priority Assistance is not available on this service.

You must inform us if the service is intended to be used in conjunction with a disability or medical service, back to base alarm or is intended to carry data services such as Fax, EFTPOS or HiCaps. These services may not be supported or may require an alternative service or additional equipment.

Calls to some International destinations are blocked by default due to high risk of fraud. You may arrange with Mint to unblock these destinations upon accepting full responsibility for payment for any calls from your service to these destinations.
